## The Language of planning

Qualifier – Renown Equipment  
Your equipment

Question 1: In treatment Planning,  
when does the conversation actually  
Start?

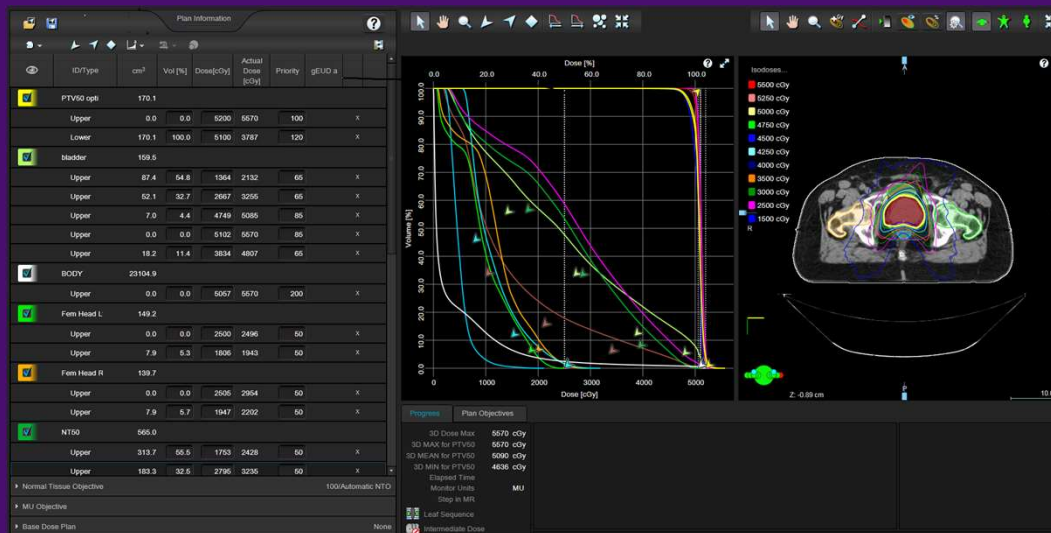

Question 2: How much difference  
does what I say really make?

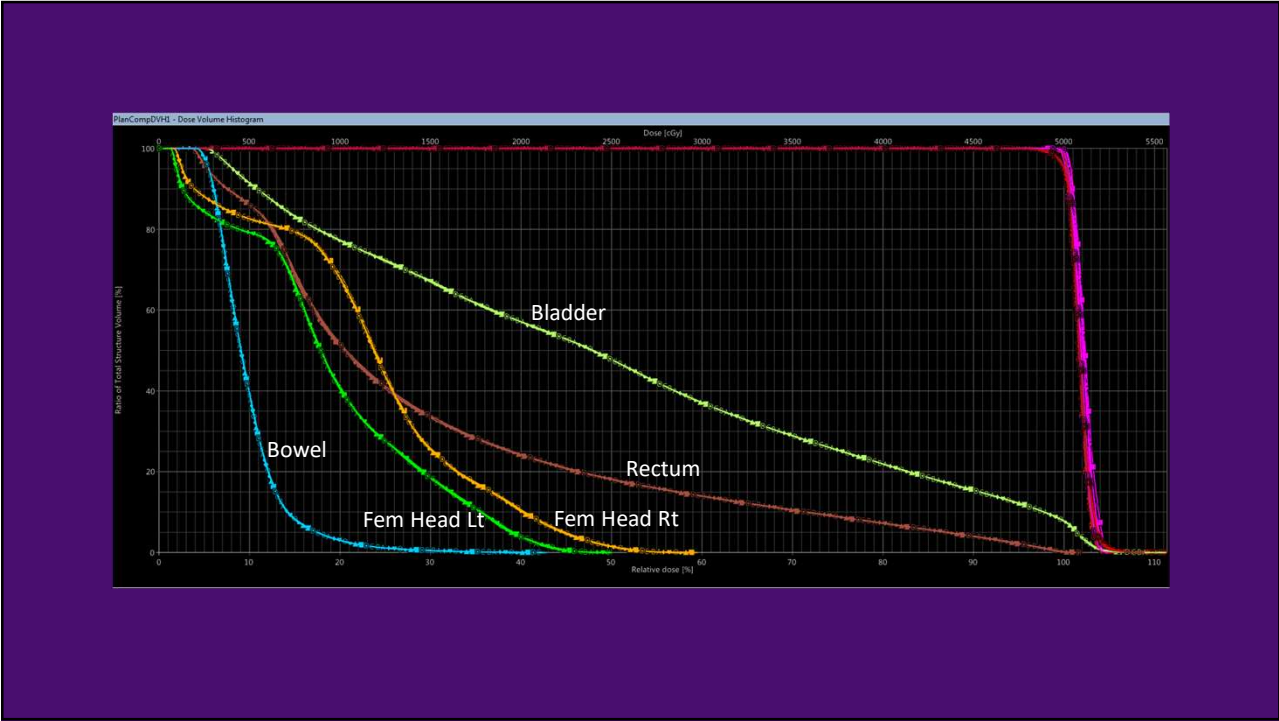

Question 3: What did we do to  
Evaluate?

Question 3: How did we evaluate?  
Let's start with question 3.

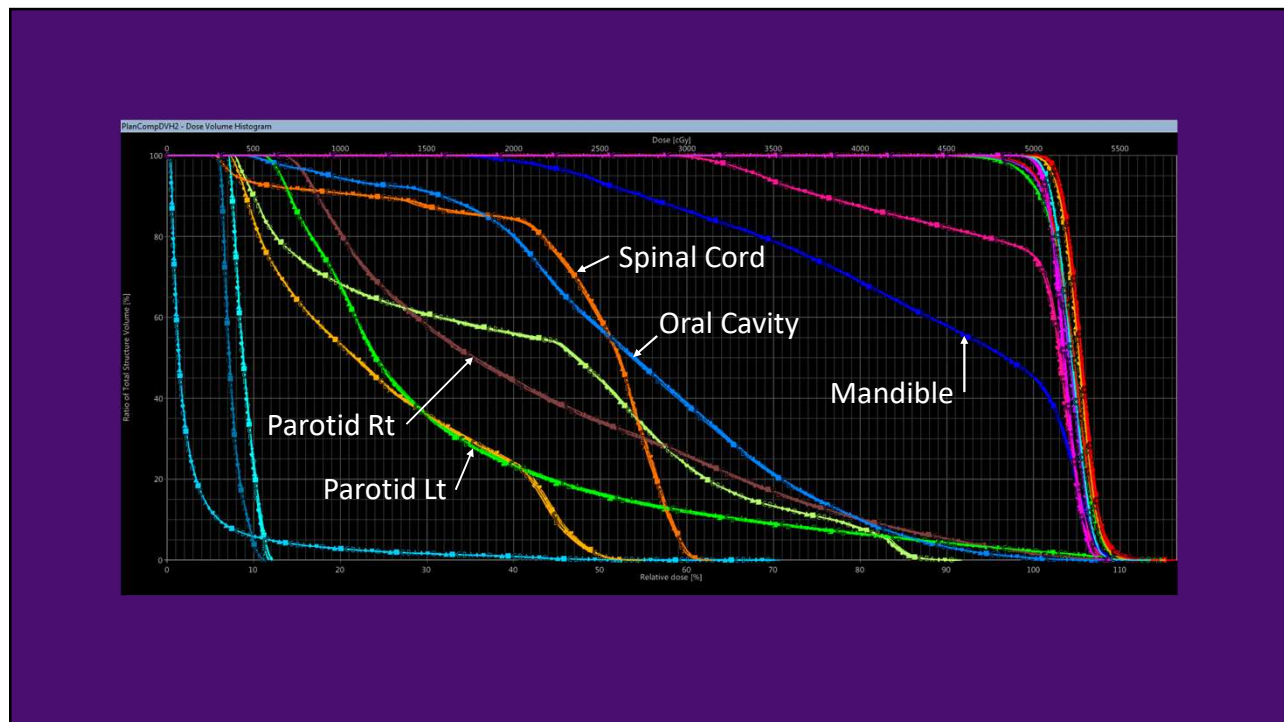

## Baseline

- Existing Patient
- Existing Optimization Criteria
- Utilized Non-Adjusted Optimization Parameters
- Allowed Plan to Run Through Optimization Undisturbed
- Normalized, then Evaluated Same plan 10 times

ID/Type	cm <sup>3</sup>	Vol [%]	Dose [cGy]	Actual Dose [cGy]	Priority	gEUD a
Lower	79.7	100.0	5100	4198	150	x
ph70	318.2					
Upper	0.0	0.0	5200	5834	100	x
Lower	318.2	100.0	5100	4049	150	x
BCOY	19390.0					
Upper	0.0	0.0	5291	5834	300	x
Brain	1679.7					
Upper	116.9	7.0	23	481	60	x
Upper	34.7	2.1	304	1303	60	x
Upper	0.0	0.0	2064	3509	60	x
Brainstem st	41.5					
Upper	0.0	0.0	2796	2981	75	x
Cord exp	126.8					
Upper	0.0	0.0	3004	4012	85	x
esophagus	9.5					
Upper	5.4	56.8	400	1526	60	x
Upper	3.5	36.6	1330	2216	60	x
Upper	1.6	18.8	2346	3156	60	x
Upper	0.0	0.0	4235	4469	60	x
larynx	34.6					

Question 1: In treatment Planning,  
when does the conversation actually  
Start?

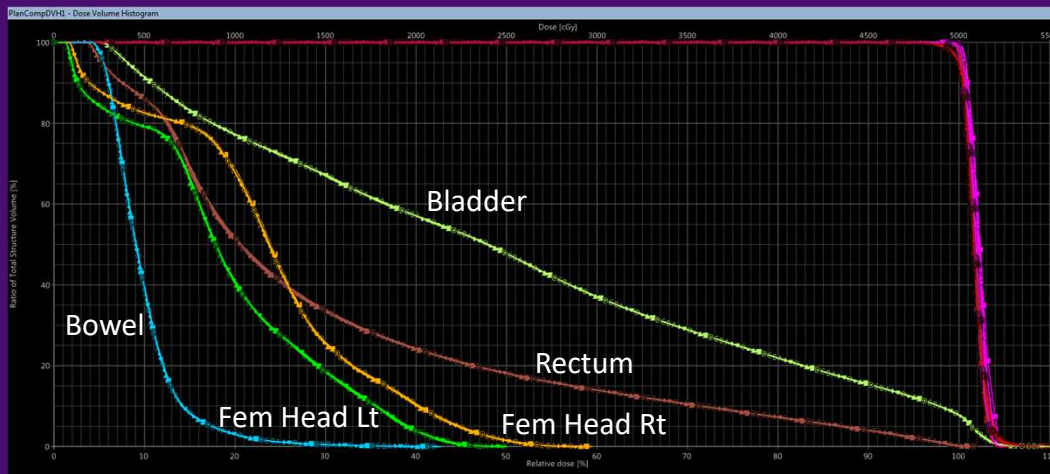

Question 2: How much difference  
does what I say really make?

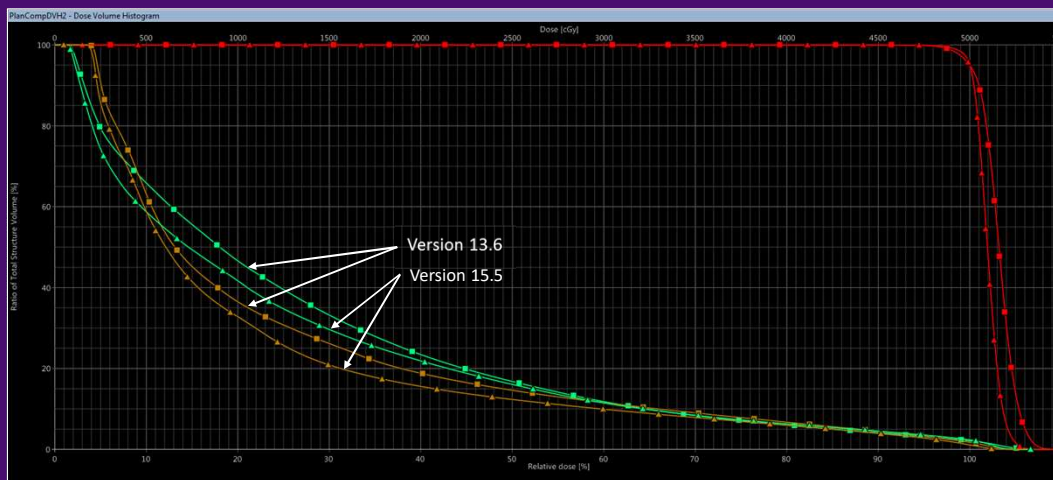

Let's Backtrack to the  
beginning, play and find out

Treatment Machine Choice  
(Leaf Width)

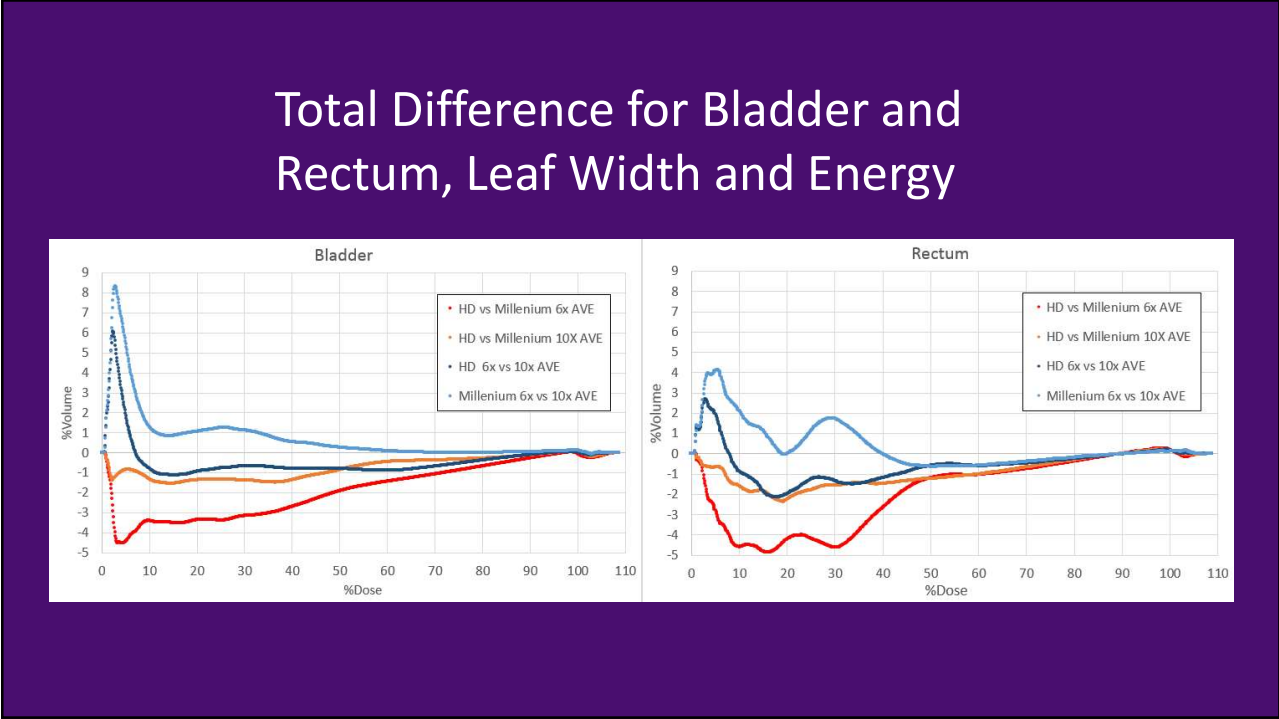

# Energy Selection

**Total Difference for Bladder and Rectum, Leaf Width and Energy**

## Total Difference for Bladder and Rectum, Leaf Width and Energy

## Planning Algorithm

# Planning Algorithm

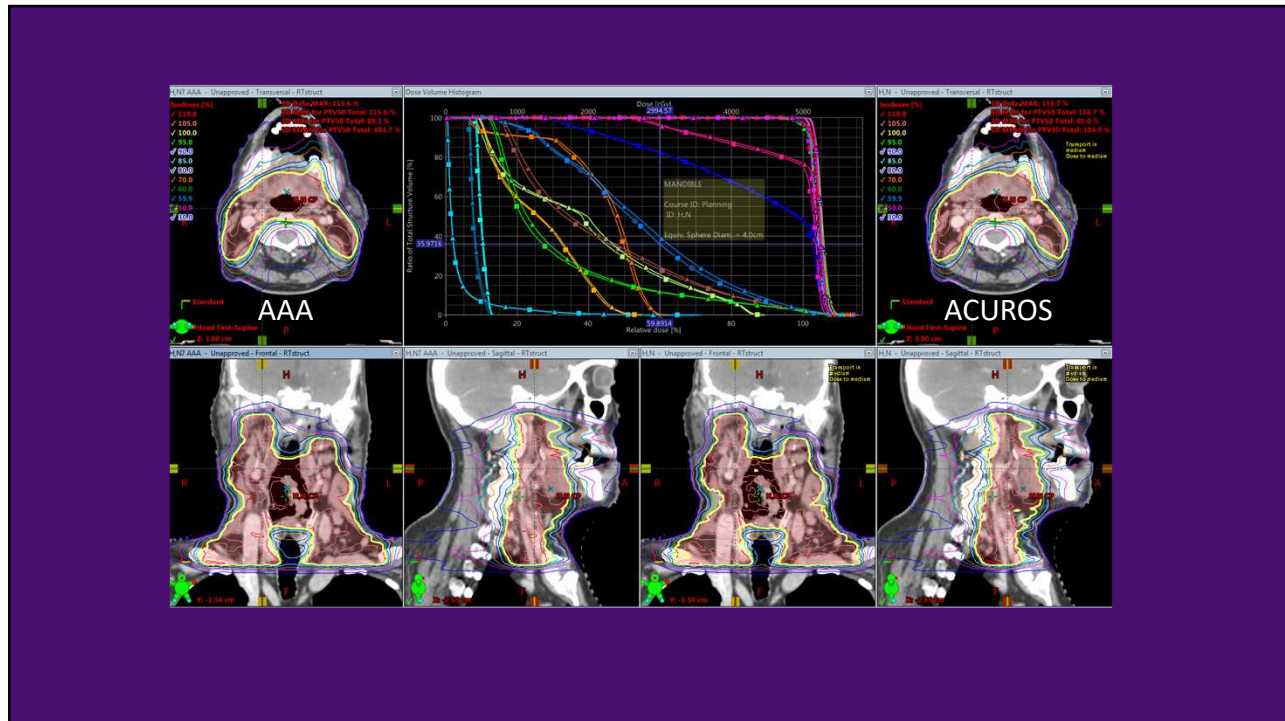

## AAA – 3D Pencil Beam

## Acuros – Simplified Monte Carlo

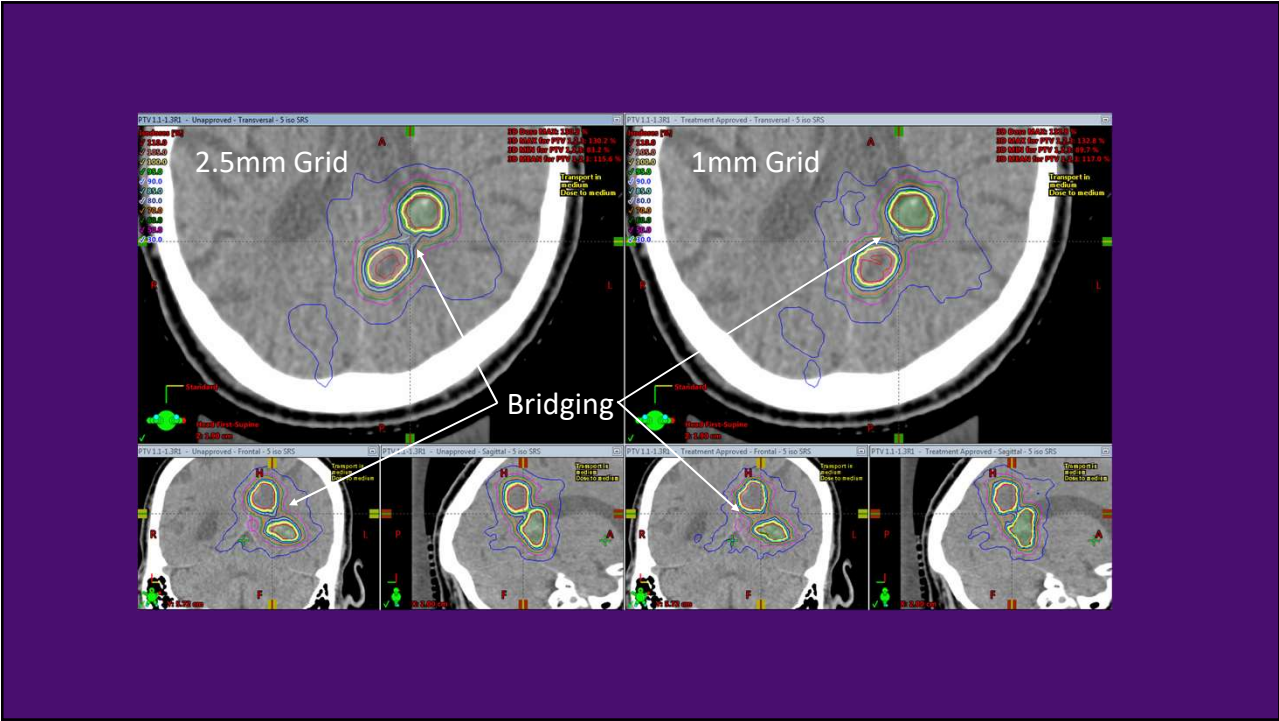

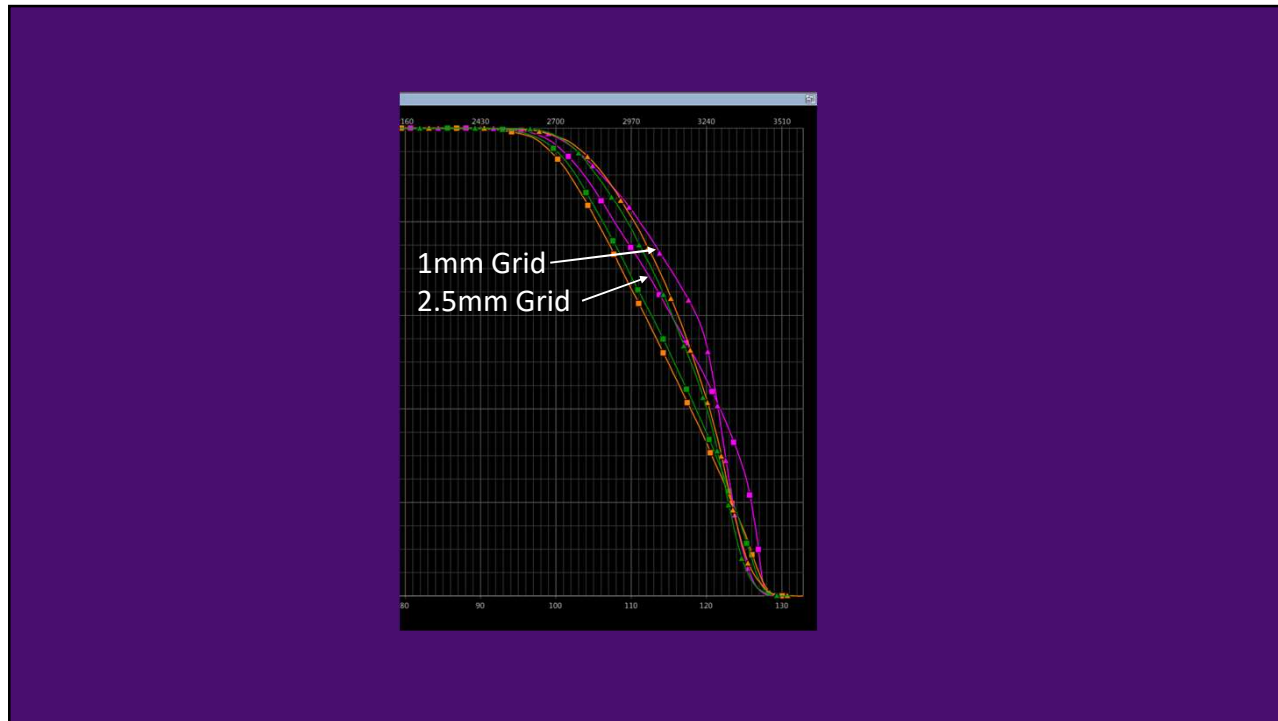

Grid Spacing

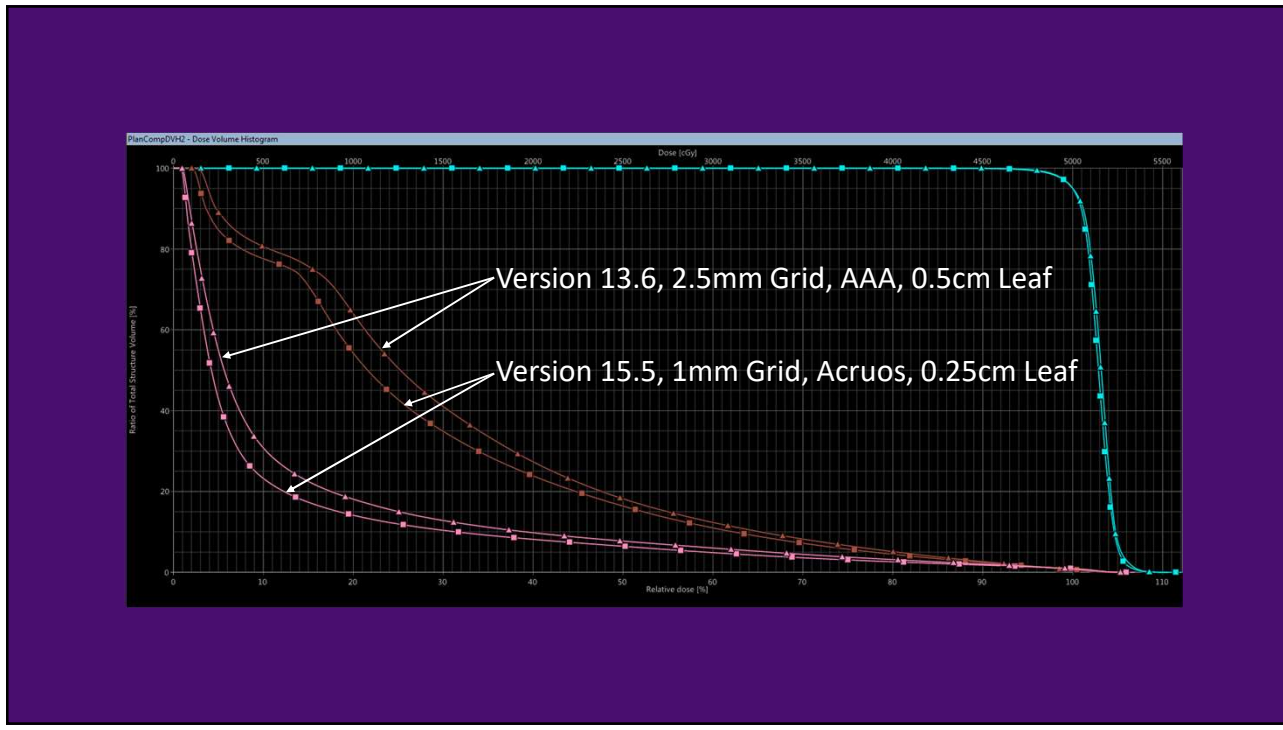

Acruos, 2.5mm Grid  
vs 1.5mm Grid – 1mm Grid Unavailable

Combined Effect

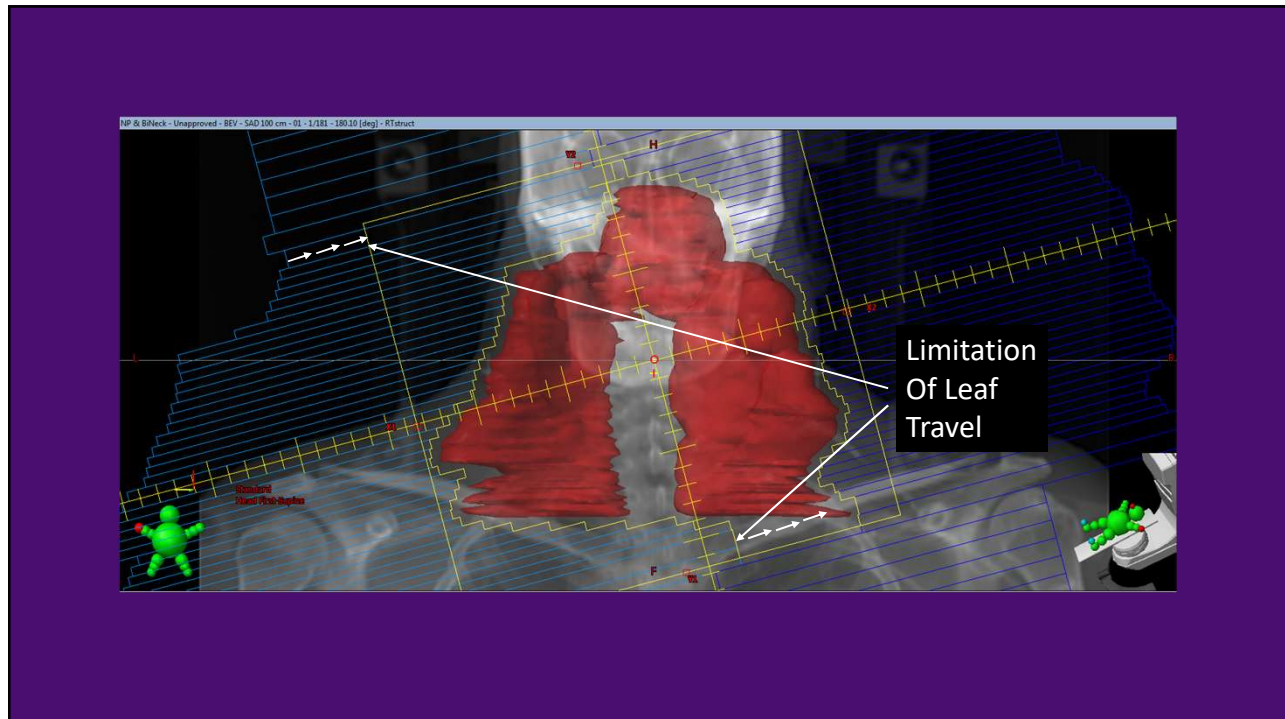

Combined Effect  
Worst case to Best

Combined Effect  
Worst case to Best  
(SO FAR!!!)

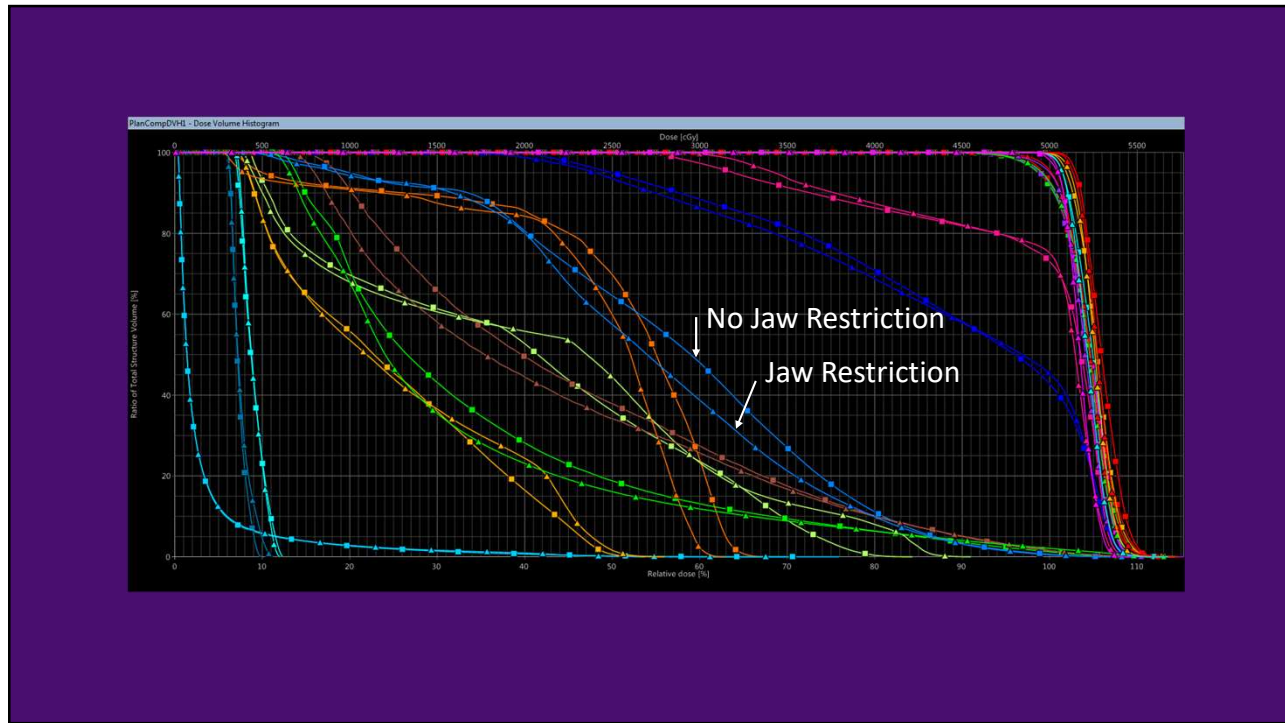

Let's Keep Going

Field Size

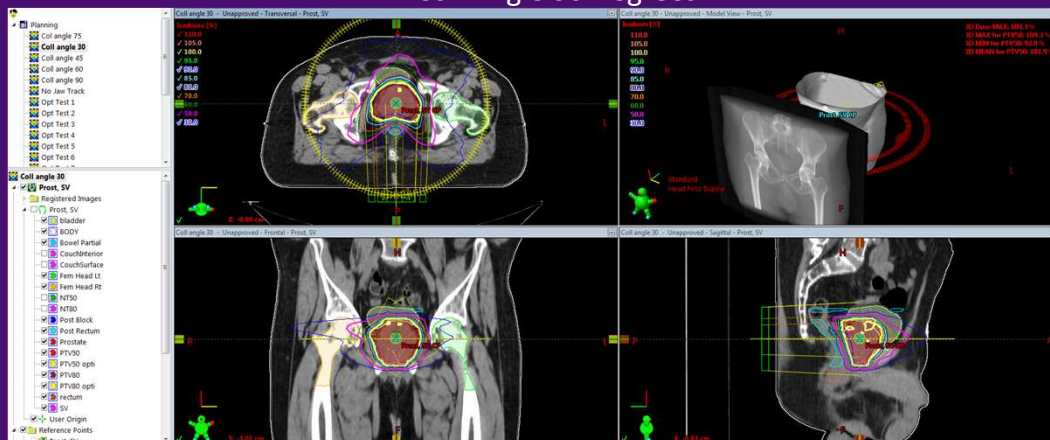

Collimator Angle

### Coll Angle 15 Degrees

### Coll Angle 30 Degrees

### Coll Angle 45 Degrees

### Coll Angle 60 Degrees

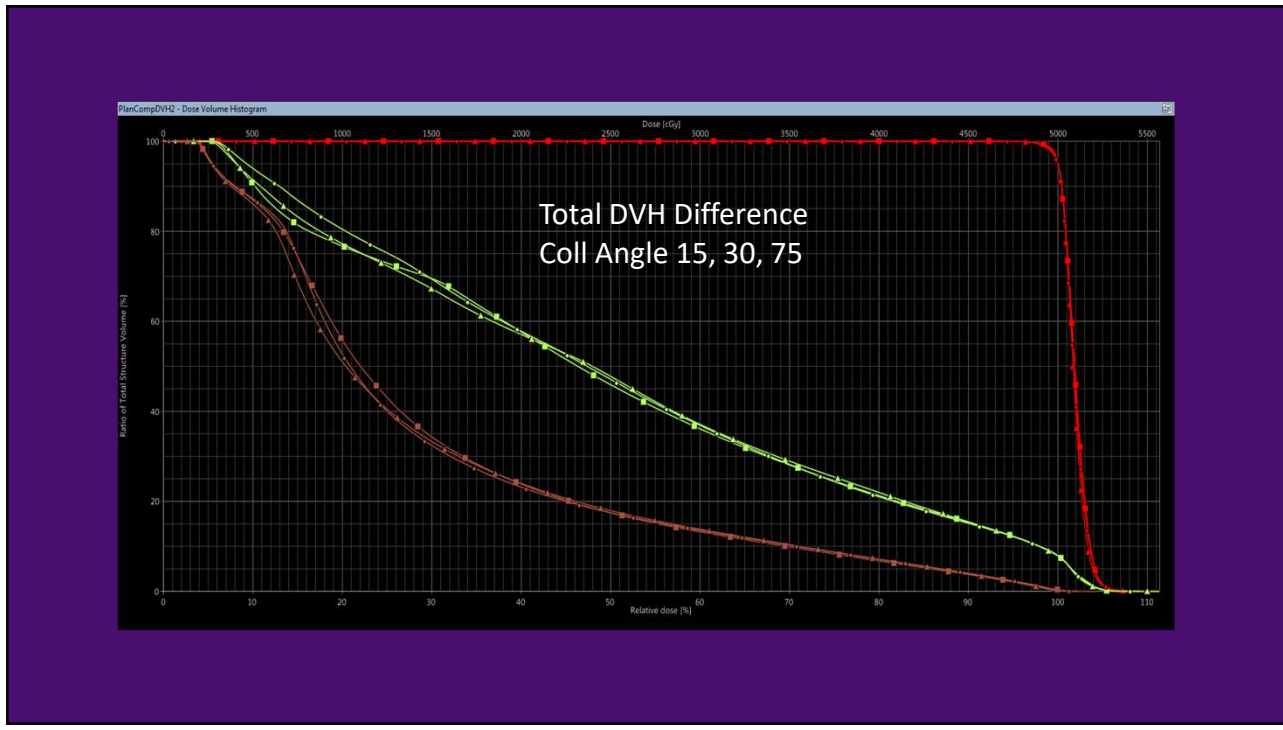

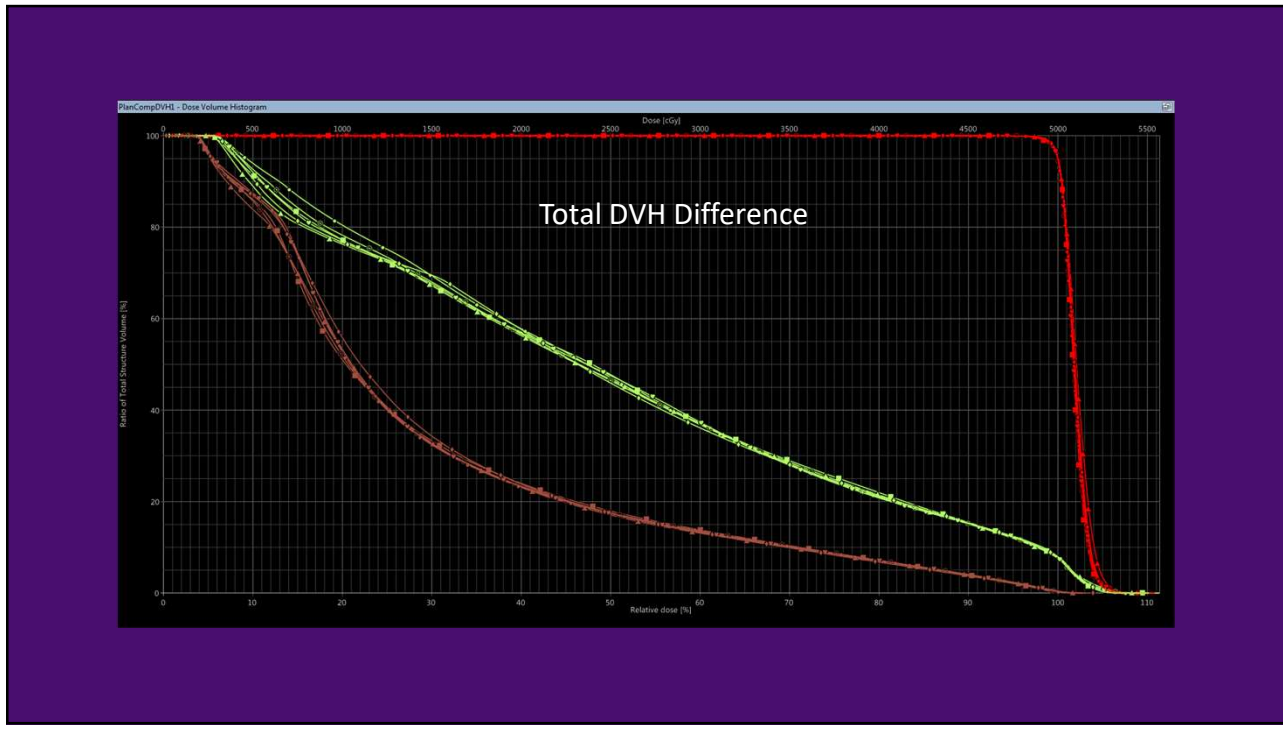

### Coll Angle 75 Degrees

### Coll Angle 90 Degrees

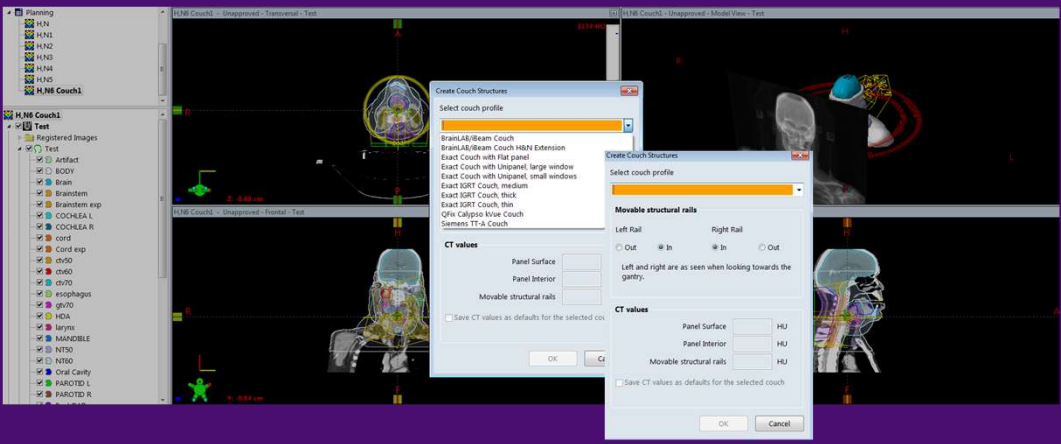

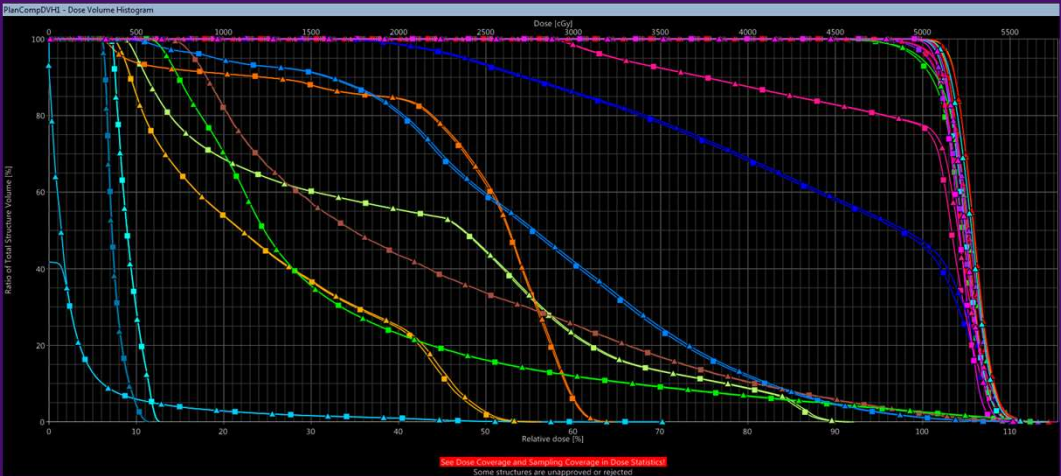

## Additional Factors

# Couch

# Couch, H,N

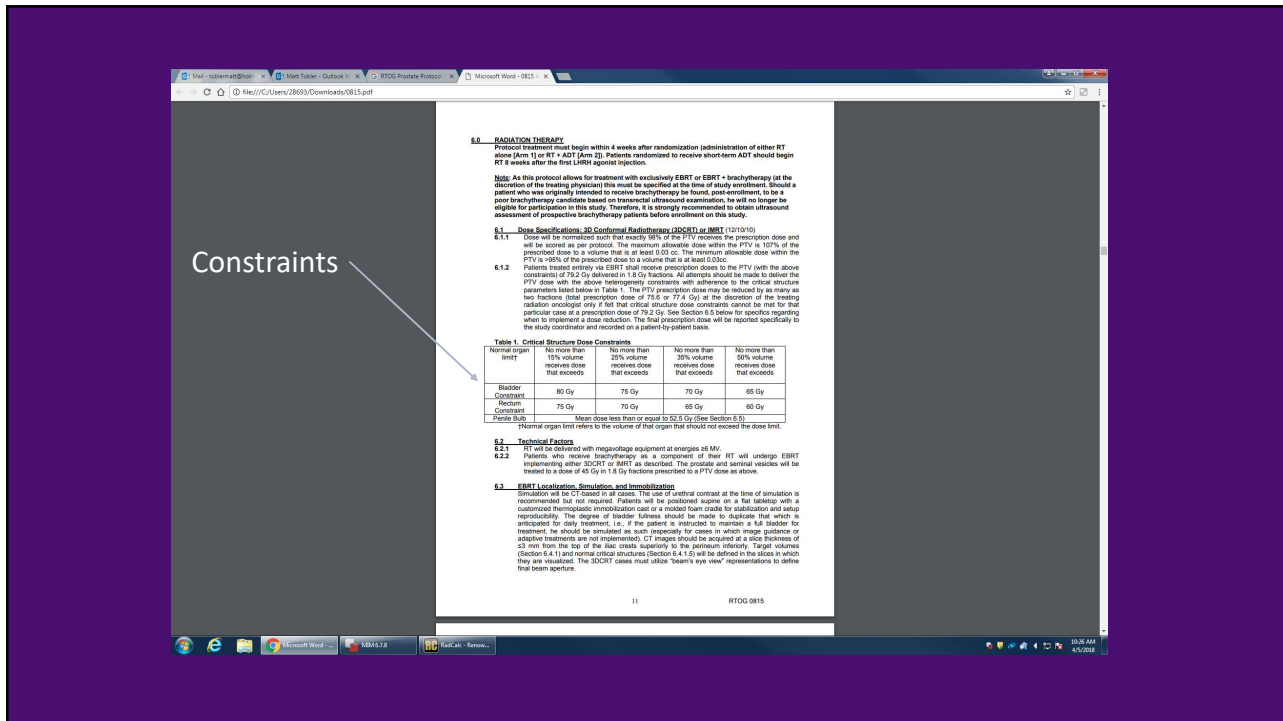

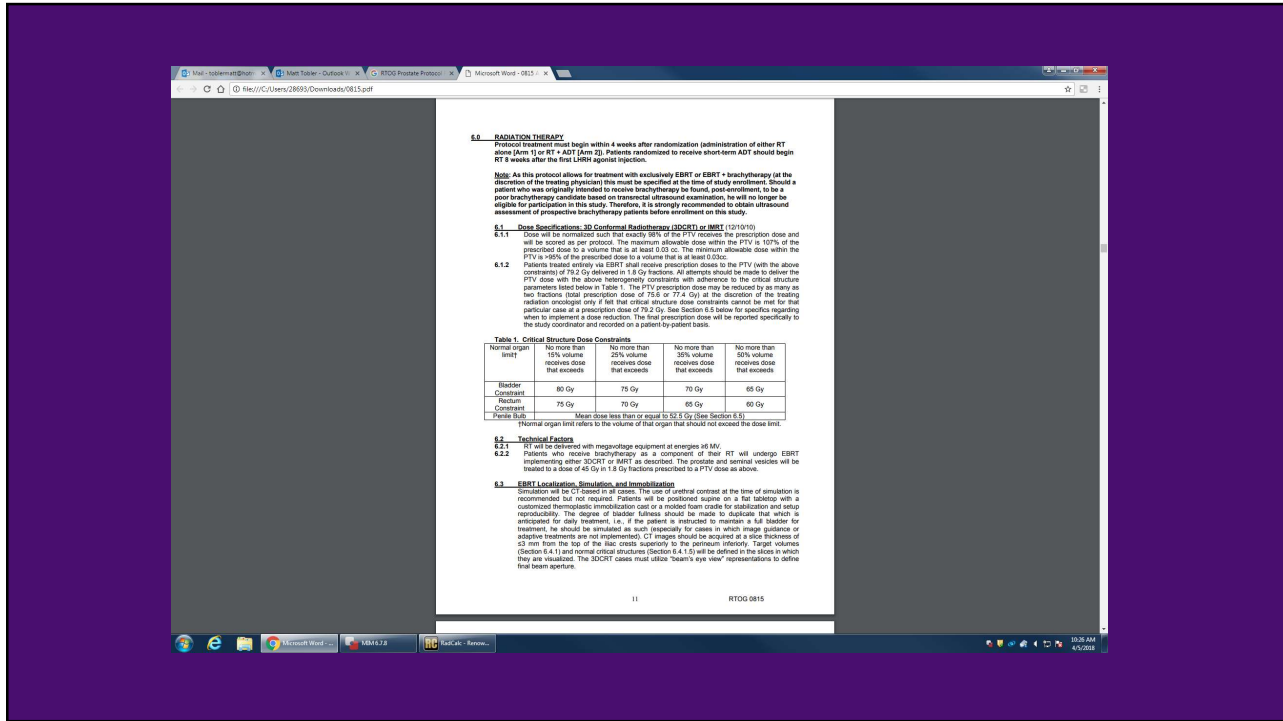

Note of Interest:

Note of Interest:  
We haven't actually even  
started running our plan yet!

Optimization – The 'Real'  
Conversation

## Optimization – 4 types

- ## Optimization – 4 types
- 1) Minimal Constraint

- Optimization – 4 types
- 1) Minimal Constraint
  - 2) Brute Force

- Optimization – 4 types
- 1) Minimal Constraint
  - 2) Brute Force
  - 3) Single Pixel Ownership

Structure List Brute Force

Prostate Overlaps

- Bladder
- Rectum
- PTV

Structure List Single Pixel

Prostate Single Owner

- Bladder
- Bladder in PTV
- Bladder – PTV
- Rectum in PTV
- Rectum – PTV
- PTV
- PTV - Bladder

Structure List Brute Force

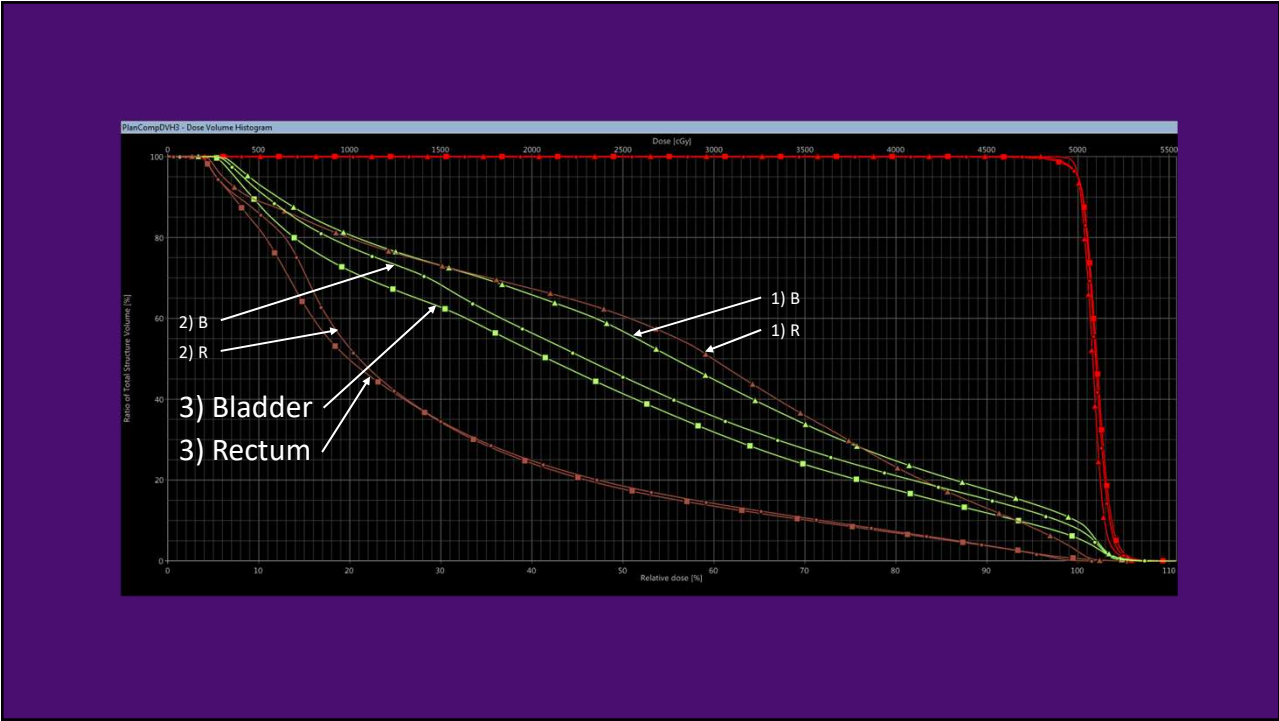

H+N Overlaps

- Parotid Rt
- Parotid Lt
- Oral Cavity
- Mandible
- Larynx
- Esophagus
- Sub Mandib Rt
- Submandib Lt
- PTV

Structure List Brute Force  
H+N Overlaps

- Parotid Rt (3 structures)
- Parotid Lt (3)
- Oral Cavity (3)
- Mandible (3)
- Larynx (3)
- Esophagus (3)
- Sub Mandib Rt (3)
- Submandib Lt (3)
- PTV (2)

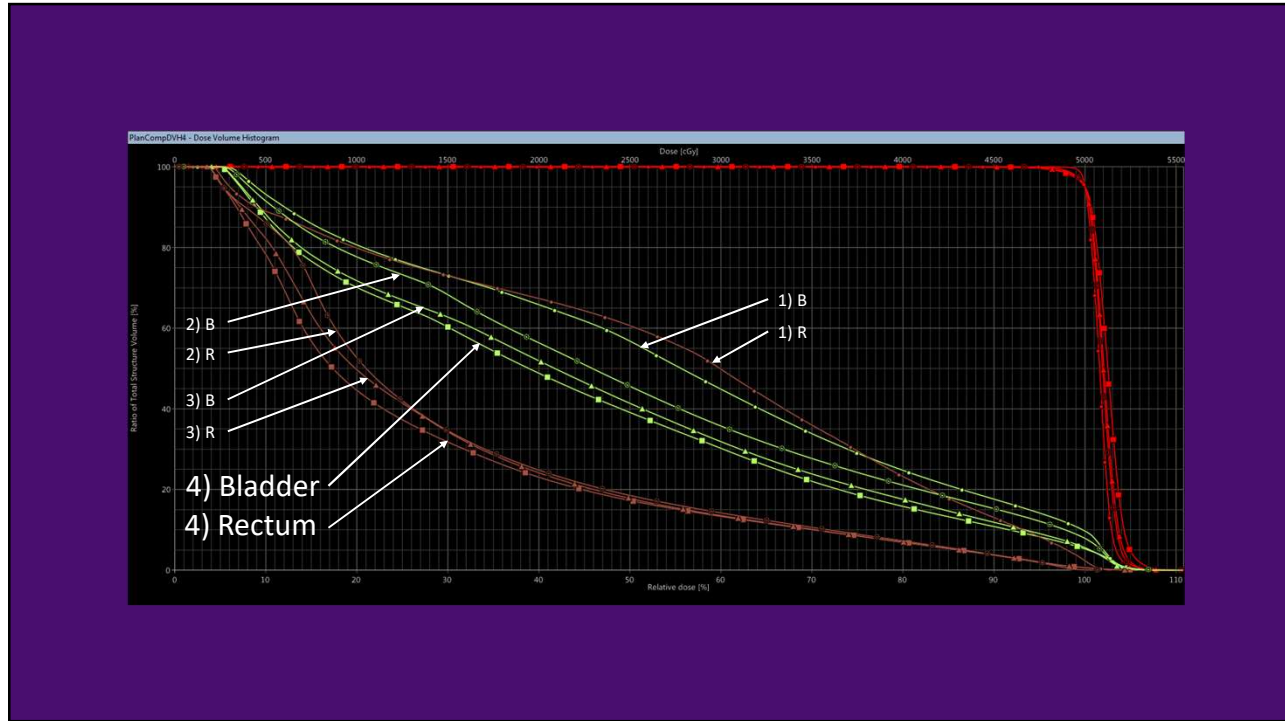

9 Structures Become  
26 Structures

## Optimization – 4 types

- 1) Minimal Constraint
- 2) Brute Force
- 3) Single Pixel Ownership
- 4) Modified Single Pixel

Normalization vs Optimization
